Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

nnable	??
TablicaAsocTest	??
a< typ >	??
a < Rekord >	??
emnikWide< typ >	??
emnikWide< Rekord >	
ord	??
oer	??
licaHash	??
Tablica Asoc ?	??

2 **Hierarchical Index**

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Runnable	. ?1
ista< typ >	. ??
ojemnikWide< typ >	. ??
Rekord	. ??
toper	. ??
ablicaAsoc	. ??
ablicaAsocTest	. ??
ablicaHash	. ??

Class Index

Chapter 3

File Index

3.1 File List

Here is a list of all files with brief descriptions:

IRunnable.cpp	. ??
IRunnable.hh	
Interfejs do testowania programow	. ??
Lista.cpp	
Lista.hh	
Interface abstrakcyjnego typu danych - Lista	. ??
main.cpp	
PojemnikWide.cpp	
Definicje metod pojedynczego elementu ADT (Lista)	. ??
PojemnikWide.hh	
Pelni role pojedynczego elementu ADT (Lista)	. ??
Rekord.cpp	. ??
Rekord.hh	
Implementacja pojedynczego rekordu "Ksiazki telefonicznej" (Tablica asocjacyjna)	
Stoper.cpp	
Stoper.hh	. ??
TablicaAsoc.cpp	
Implementacja metod klasy TablicaAsoc	. ??
TablicaAsoc.hh	
Tablica asocjacyjna	. ??
TablicaAsocTest.cpp	
Definicja metod zwiazanych z "TablicaAsocTest"	. ??
TablicaAsocTest.hh	
Testowanie tablicy asocjacyjnej	. ??
TablicaHash.cpp	
Implementacja metod tablicy hashujacej	. ??
TablicaHash.hh	
Tablica hashujaca (mieszajaca)	. ??

Chapter 4

Class Documentation

4.1 IRunnable Class Reference

#include <IRunnable.hh>

Inheritance diagram for IRunnable:

Public Member Functions

• virtual bool Testuj (string nazwapom)=0

4.1.1 Detailed Description

Definition at line 12 of file IRunnable.hh.

4.1.2 Member Function Documentation

4.1.2.1 virtual bool IRunnable::Testuj (string nazwapom) [pure virtual]

Implemented in TablicaAsocTest.

The documentation for this class was generated from the following file:

• IRunnable.hh

4.2 Lista < typ > Class Template Reference

#include <Lista.hh>

Public Member Functions

- ~Lista ()
- bool Dodaj (typ elem, int ind)
- typ Usun (int ind)
- typ Wez (int ind)
- int Rozmiar ()
- bool Czypusta ()
- void Oproznij ()
- void Wyswietl ()
- int Wyszukaj (typ szukane)

Private Attributes

- PojemnikWide< typ > * head =NULL
- PojemnikWide< typ > * tail =NULL

4.2.1 Detailed Description

template<typename typ>class Lista< typ>

Definition at line 18 of file Lista.hh.

4.2.2 Constructor & Destructor Documentation

4.2.2.1 template<typename typ > Lista< typ >:: \sim Lista ()

Destruktor - Usuwa wszystkie elementy z listy (na bazie metody "Oproznij")

Definition at line 286 of file Lista.hh.

4.2.3 Member Function Documentation

4.2.3.1 template<typename typ> bool Lista< typ>::Czypusta() [inline]

Return values

true-	gdy lista jest pusta
false-	w przypadku przeciwnym

Definition at line 32 of file Lista.hh.

4.2.3.2 template < typename typ> bool Lista < typ >::Dodaj (typ elem, int ind)

Funkcja przypisuje wartosc do przechowania elementowi typu "Pojemnik" i dodaje ten "Pojeminik" w DOWOLNYM miejscu listy czyli na koncu, poczatku badz wewnatrz listy

Parameters

in	elem-	wartosc do przechowania
in	index-	indeks listy pod jakim bedzie przechowywany pojemnik ze zmienna

Return values

false-	gdy element ma byc wstawiony w nielogicznym miejscu, np-> wstawianie elementu o indeksie 100 kiedy lista ma aktualnie indeksy od 0 do 15
true-	gdy element wstawiono poprawnie do listy

Definition at line 53 of file Lista.hh.

Here is the call graph for this function:

Here is the caller graph for this function:

4.2.3.3 template<typename typ > void Lista< typ >::Oproznij ()

Usuwa wszystkie elementy z listy

Definition at line 228 of file Lista.hh.

4.2.3.4 template<typename typ> int Lista< typ>::Rozmiar() [inline]

Definition at line 27 of file Lista.hh.

4.2.3.5 template<typename typ > typ Lista< typ >::Usun (int ind)

Usuwa element z Listy o zadanym indeksie i zwraca wartosc, ktora przechowywal

Parameters

in	ind-	indeks elementu, ktory ma zostac usuniety z listy

Definition at line 146 of file Lista.hh.

Here is the call graph for this function:

Here is the caller graph for this function:

4.2.3.6 template < typename typ > typ Lista < typ >::Wez (int ind)

Zwraca wartość elementu o zadanym indeksie

Parameters

in	ind-	indeks poszukiwanego elementu

Definition at line 118 of file Lista.hh.

Here is the call graph for this function:

Here is the caller graph for this function:

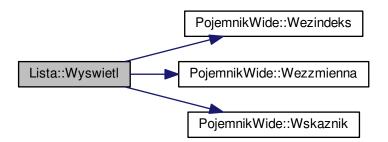

4.2.3.7 template<typename typ > void Lista< typ >::Wyswietl ()

Wyswietla zawartosc listy na standardowe wyjscie

Definition at line 242 of file Lista.hh.

Here is the call graph for this function:

Here is the caller graph for this function:

4.2.3.8 template<typename typ> int Lista< typ>::Wyszukaj (typ szukane)

Wyszukuje podany wyraz wsrod elementow listy

Parameters

in	szukane-	szukany wyraz
Return values		
	<i>zwraca</i> r	numer indeksu elementu, ktory przechowuje szukany wyraz lub -1 w przypadku
	j	ego nieznalezienia

Definition at line 269 of file Lista.hh.

Here is the call graph for this function:

Here is the caller graph for this function:

4.2.4 Member Data Documentation

4.2.4.1 template<typename typ> PojemnikWide<typ>* Lista< typ >::head =NULL [private]

Definition at line 19 of file Lista.hh.

4.2.4.2 template<typename typ> PojemnikWide<typ>* Lista< typ>::tail =NULL [private]

Definition at line 20 of file Lista.hh.

The documentation for this class was generated from the following file:

· Lista.hh

4.3 PojemnikWide < typ > Class Template Reference

#include <PojemnikWide.hh>

Public Member Functions

- void Zmienpole (typ pom)
- int & Wezindeks ()
- typ Wezzmienna ()
- PojemnikWide< typ > * Wskaznik ()

Public Attributes

PojemnikWide< typ > * wsk =NULL

Private Attributes

- · typ zmienna
- int indeks =0

4.3.1 Detailed Description

template<typename typ>class PojemnikWide< typ>

Definition at line 13 of file PojemnikWide.hh.

4.3.2 Member Function Documentation

4.3.2.1 template<typename typ> int& PojemnikWide< typ>::Wezindeks() [inline]

Definition at line 20 of file PojemnikWide.hh.

Here is the caller graph for this function:

4.3.2.2 template<typename typ> typ PojemnikWide< typ >::Wezzmienna () [inline]

Definition at line 21 of file PojemnikWide.hh.

Here is the caller graph for this function:

4.3.2.3 template<typename typ> PojemnikWide<typ>* PojemnikWide< typ>::Wskaznik() [inline]

Definition at line 22 of file PojemnikWide.hh.

Here is the caller graph for this function:

4.3.2.4 template<typename typ> void PojemnikWide< typ >::Zmienpole (typ pom) [inline]

Definition at line 19 of file PojemnikWide.hh.

Here is the caller graph for this function:

4.3.3 Member Data Documentation

4.3.3.1 template<typename typ> int PojemnikWide< typ >::indeks =0 [private]

Definition at line 15 of file PojemnikWide.hh.

4.3.3.2 template < typename typ > PojemnikWide < typ > * PojemnikWide < typ > ::wsk = NULL

Definition at line 17 of file PojemnikWide.hh.

4.3.3.3 template<typename typ> typ PojemnikWide< typ>::zmienna [private]

Definition at line 14 of file PojemnikWide.hh.

The documentation for this class was generated from the following file:

· PojemnikWide.hh

4.4 Rekord Class Reference

#include <Rekord.hh>

Public Member Functions

- · Rekord ()
- Rekord (string pklucz)
- Rekord (string pklucz, int pnumer)
- string & WezKlucz ()
- int & WezNumer ()

Private Attributes

- string klucz
- int numer =0

4.4.1 Detailed Description

Definition at line 13 of file Rekord.hh.

4.4.2 Constructor & Destructor Documentation

4.4.2.1 Rekord::Rekord() [inline]

Definition at line 17 of file Rekord.hh.

4.4.2.2 Rekord::Rekord (string *pklucz*) [inline]

Definition at line 18 of file Rekord.hh.

4.4.2.3 Rekord::Rekord (string *pklucz*, int *pnumer*) [inline]

Definition at line 19 of file Rekord.hh.

4.4.3 Member Function Documentation

4.4.3.1 string& Rekord::WezKlucz() [inline]

Definition at line 20 of file Rekord.hh.

Here is the caller graph for this function:

4.4.3.2 int& Rekord::WezNumer() [inline]

Definition at line 21 of file Rekord.hh.

Here is the caller graph for this function:

4.4.4 Member Data Documentation

4.4.4.1 string Rekord::klucz [private]

Definition at line 14 of file Rekord.hh.

```
4.4.4.2 int Rekord::numer = 0 [private]
```

Definition at line 15 of file Rekord.hh.

The documentation for this class was generated from the following file:

· Rekord.hh

4.5 Stoper Class Reference

```
#include <Stoper.hh>
```

Public Member Functions

- void start ()
- void stop ()
- · double get_time ()

roznica czasowa

• bool zapis_do_pliku ()

Zapis zmierzonego czasu do pliku.

Private Attributes

- timeval czas1
- timeval czas2

4.5.1 Detailed Description

Definition at line 11 of file Stoper.hh.

4.5.2 Member Function Documentation

```
4.5.2.1 double Stoper::get_time ( )
```

Zwraca roznice czasu miedzy "startem a "stopem". Wartosci wyrazone w mikrosekundach

Definition at line 9 of file Stoper.cpp.

Here is the caller graph for this function:

4.5.2.2 void Stoper::start () [inline]

Definition at line 16 of file Stoper.hh.

Here is the caller graph for this function:

4.5.2.3 void Stoper::stop() [inline]

Definition at line 17 of file Stoper.hh.

Here is the caller graph for this function:

4.5.2.4 bool Stoper::zapis_do_pliku()

Wywolanie tej funkcji skutkuje dopisaniem do pliku "czasy.dat" ostatniej roznicy czasowej ("czas_stop"-"czas_start) Wartosci wyrazone w sekundach

Definition at line 43 of file Stoper.cpp.

Here is the call graph for this function:

Here is the caller graph for this function:

4.5.3 Member Data Documentation

4.5.3.1 timeval Stoper::czas1 [private]

Definition at line 12 of file Stoper.hh.

4.5.3.2 timeval Stoper::czas2 [private]

Definition at line 13 of file Stoper.hh.

The documentation for this class was generated from the following files:

- · Stoper.hh
- · Stoper.cpp

4.6 TablicaAsoc Class Reference

#include <TablicaAsoc.hh>

Inheritance diagram for TablicaAsoc:

Collaboration diagram for TablicaAsoc:

Public Member Functions

- TablicaAsoc ()
- TablicaAsoc (int prozmiar)
- ∼TablicaAsoc ()
- int operator[] (string szukanyklucz)

4.6.1 Detailed Description

Definition at line 11 of file TablicaAsoc.hh.

4.6.2 Constructor & Destructor Documentation

4.6.2.1 TablicaAsoc::TablicaAsoc() [inline]

Definition at line 14 of file TablicaAsoc.hh.

4.6.2.2 TablicaAsoc::TablicaAsoc (int prozmiar) [inline]

Definition at line 15 of file TablicaAsoc.hh.

4.6.2.3 TablicaAsoc::~TablicaAsoc() [inline]

Definition at line 16 of file TablicaAsoc.hh.

4.6.3 Member Function Documentation

4.6.3.1 int TablicaAsoc::operator[] (string szukanyklucz)

Metoda wyszukujaca numer dla podanego klucza

Parameters

in	szukanyklucz-	dla tego klucza szukamy numer

Return values

numer	telefonu dla szukanego klucza

Definition at line 16 of file TablicaAsoc.cpp.

Here is the call graph for this function:

The documentation for this class was generated from the following files:

- · TablicaAsoc.hh
- TablicaAsoc.cpp

4.7 TablicaAsocTest Class Reference

#include <TablicaAsocTest.hh>

Inheritance diagram for TablicaAsocTest:

Collaboration diagram for TablicaAsocTest:

Public Member Functions

bool Testuj (string nazwapom)

Testuje dodawanie i usuwanie elementow z tablicy asocjacyjnej.

4.7.1 Detailed Description

Definition at line 15 of file TablicaAsocTest.hh.

4.7.2 Member Function Documentation

4.7.2.1 bool TablicaAsocTest::Testuj (string nazwapom) [virtual]

Wczytuje z pliku dane (klucz i numer) (nazwa pliku jest podana jako argument funkcji) i zapisuje je do tablicy asocjacyjnej, mierzy czas tej operacji, a nastepnie usuwa zapisane dane z tablicy i rowniez mierzy czas wykonywania tej operacji. Ilosc danych jaka ma byc wczytana i zapisana do tablicy asocjacyjnej jest przechowywana w pomocniczej, zwyklej tablicy "rozmiar". Tablica "rozmiar" jest wypelniana pomocnicza funkcja "PrzypiszLiczby"

Parameters

in	nazwapom-	nazwa pliku ktory przechowuje dane do wczytywania

Return values

true-	jesli operacja testowania powiodla sie

Implements IRunnable.

Definition at line 45 of file TablicaAsocTest.cpp.

Here is the call graph for this function:

Here is the caller graph for this function:

The documentation for this class was generated from the following files:

- · TablicaAsocTest.hh
- TablicaAsocTest.cpp

4.8 TablicaHash Class Reference

#include <TablicaHash.hh>

Inheritance diagram for TablicaHash:

Collaboration diagram for TablicaHash:

Public Member Functions

- TablicaHash ()
- TablicaHash (int prozmiar)
- ∼TablicaHash ()
- int Haszuj (string nazwa)
- bool Dodaj (string klucz, int numer)
- int Usun (string klucz)
- void Wyswietl ()

Private Attributes

- Lista < Rekord > * tablica
- int rozmiar =10

Friends

class TablicaAsoc

4.8.1 Detailed Description

Definition at line 14 of file TablicaHash.hh.

4.8.2 Constructor & Destructor Documentation

4.8.2.1 TablicaHash::TablicaHash() [inline]

Definition at line 21 of file TablicaHash.hh.

4.8.2.2 TablicaHash::TablicaHash (int *prozmiar*) [inline]

Definition at line 22 of file TablicaHash.hh.

4.8.2.3 TablicaHash:: \sim TablicaHash() [inline]

Definition at line 23 of file TablicaHash.hh.

4.8.3 Member Function Documentation

4.8.3.1 bool TablicaHash::Dodaj (string klucz, int numer)

Funkcja dodajaca zestaw danych do tablicy haszujacej

Parameters

in	klucz-na	jego podstawie funkcja dobiera indeks tablicy gdzie maja byc zapisane dane
in	numer-	jedna z dwoch danych do przechowania

Return values

true-jesli	dodawanie do tablicy powiodlo sie

Definition at line 32 of file TablicaHash.cpp.

Here is the call graph for this function:

Here is the caller graph for this function:

4.8.3.2 int TablicaHash::Haszuj (string nazwa)

Mapuje klucz typu string na integer w stalym przedziale [0,rozmiartablicy-1]

Parameters

in	nazwa-klucz	do mapowania

Return values

indeks	tablicy, do ktorej maja byc zapisane dane

Definition at line 15 of file TablicaHash.cpp.

Here is the caller graph for this function:

4.8.3.3 int TablicaHash::Usun (string klucz)

Usuwa element z tablicy Haszujacej o danym kluczu i zwraca numer powiazany z tym kluczem

Parameters

in	klucz-	element o takim kluczu zostanie usuniety
----	--------	--

Return values

Numer	powiazany z kluczem, ktory zostanie razem z nim usuniety lub -1 gdy element o
	podanym kluczu nie istnieje

Definition at line 46 of file TablicaHash.cpp.

Here is the call graph for this function:

Here is the caller graph for this function:

4.8.3.4 void TablicaHash::Wyswietl ()

Wyswietla na standardowe wyjscie zwartosc tablicy haszujacej

Definition at line 62 of file TablicaHash.cpp.

Here is the call graph for this function:

4.8.4 Friends And Related Function Documentation

4.8.4.1 friend class TablicaAsoc [friend]

Definition at line 15 of file TablicaHash.hh.

4.8.5 Member Data Documentation

4.8.5.1 int TablicaHash::rozmiar =10 [private]

Definition at line 18 of file TablicaHash.hh.

```
4.8.5.2 Lista<Rekord>* TablicaHash::tablica [private]
```

Definition at line 17 of file TablicaHash.hh.

The documentation for this class was generated from the following files:

- TablicaHash.hh
- TablicaHash.cpp

Chapter 5

File Documentation

5.1 IRunnable.cpp File Reference

#include "IRunnable.hh"
Include dependency graph for IRunnable.cpp:

5.2 IRunnable.hh File Reference

Include dependency graph for IRunnable.hh:

This graph shows which files directly or indirectly include this file:

Classes

· class IRunnable

5.3 Lista.cpp File Reference

#include "Lista.hh"

5.4 Lista.hh File Reference 31

Include dependency graph for Lista.cpp:

5.4 Lista.hh File Reference

interface abstrakcyjnego typu danych - Lista

```
#include <iostream>
#include "PojemnikWide.hh"
#include <string>
Include dependency graph for Lista.hh:
```

32 File Documentation

This graph shows which files directly or indirectly include this file:

Classes

class Lista< typ >

5.4.1 Detailed Description

Elementy do Listy mozesz dodawac lub usuwac dowolnie czyli na poczatku, koncu badz wewnatrz listy Definition in file Lista.hh.

5.5 main.cpp File Reference

#include <iostream>
#include "TablicaAsocTest.hh"

Include dependency graph for main.cpp:

Functions

• int main ()

5.5.1 Function Documentation

5.5.1.1 int main ()

Definition at line 5 of file main.cpp.

Here is the call graph for this function:

5.6 PojemnikWide.cpp File Reference

Definicje metod pojedynczego elementu ADT (Lista)

#include "PojemnikWide.hh"
Include dependency graph for PojemnikWide.cpp:

5.7 PojemnikWide.hh File Reference

Pelni role pojedynczego elementu ADT (Lista)

#include <iostream>
#include <string>
Include dependency graph for PojemnikWide.hh:

This graph shows which files directly or indirectly include this file:

Classes

class PojemnikWide< typ >

5.8 Rekord.cpp File Reference

#include "Rekord.hh"
Include dependency graph for Rekord.cpp:

Functions

- bool operator== (Rekord istniejace, Rekord szukane)
- ostream & operator<< (ostream &strm, Rekord rek)

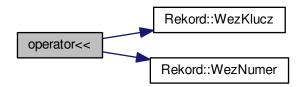

Wyswietlanie rekordow.

5.8.1 Function Documentation

5.8.1.1 ostream& operator << (ostream & strm, Rekord rek)

Definition at line 17 of file Rekord.cpp.

Here is the call graph for this function:

5.8.1.2 bool operator== (Rekord istniejace, Rekord szukane)

Przeciazenie operatora porownania dla dwoch obiektow typu "Rekord". Funkcja potrzebna do wyszukiwania rekordu w tablicy haszujacej

Definition at line 7 of file Rekord.cpp.

Here is the call graph for this function:

5.9 Rekord.hh File Reference

Implementacja pojedynczego rekordu "Ksiazki telefonicznej" (Tablica asocjacyjna)

```
#include <iostream>
#include <string>
```

Include dependency graph for Rekord.hh:

This graph shows which files directly or indirectly include this file:

Classes

• class Rekord

Functions

- bool operator== (Rekord istniejace, Rekord szukane)
- ostream & operator<< (ostream &strm, Rekord rek)

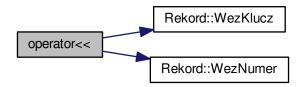

Wyswietlanie rekordow.

5.9.1 Function Documentation

5.9.1.1 ostream& operator << (ostream & strm, Rekord rek)

Definition at line 17 of file Rekord.cpp.

Here is the call graph for this function:

5.9.1.2 bool operator== (Rekord istniejace, Rekord szukane)

Przeciazenie operatora porownania dla dwoch obiektow typu "Rekord". Funkcja potrzebna do wyszukiwania rekordu w tablicy haszujacej

Definition at line 7 of file Rekord.cpp.

Here is the call graph for this function:

5.10 Stoper.cpp File Reference

#include "Stoper.hh"

Include dependency graph for Stoper.cpp:

Functions

bool otworz_plik (string nazwapom, ofstream &StrmPlikowy)
 otwarcie pliku

5.10.1 Function Documentation

5.10.1.1 bool otworz_plik (string nazwapom, ofstream & StrmPlikowy)

Otwiera plik i tworzy strumien do zapisywania UWAGA: PLIK OTWARTY W TRYBIE DOPISYWANIA Parameters

in	nazwapom-	nazwa pliku, ktory ma zostac otwarty/utworzony
in	StrmPlikowy-	Zapisywany jest w nim strumien gdzie bedziemy zapisywac dane

Definition at line 23 of file Stoper.cpp.

Here is the caller graph for this function:

5.11 Stoper.hh File Reference

```
#include <iostream>
#include <fstream>
